

Suggested System Components – Wired Thermocouple System (Temperature Distribution)

We recommend the following complete set of Wired Temperature Distribution data collection equipment (SKU in parentheses):

- 1 - Temperature Distribution Wire Set
 - 32 Temperature Distribution/Free Lead Wires
 - Datalogger End: Male Subminiature Connector (#SUBMIN-M*)
 - Retort End: Hot Junction
- 1 - CALPlex Datalogger
 - Either Standard (#CPLX-STANDARD) or Rotary (#CPLX-ROTARY)
 - depending on the retort you are using for testing
- 1 - CALSoft™ Software (#CSF), Full Version

Tools to Include:

- 1 - Packing Gland (#C24FL), sized for the opening on the retort
